

Milan, November 15th 2016

To Whom It May Concern,

We have known Arteza in a professional capacity since 2015, sharing in a proactive way our international approach to landscape design in russian projects.

We started collaborating for the urban landscape design about the project "Nedelina street and International Street" in Odintsovo, in order to define a high quality urban image, along with dynamic related to the surrounding context.

We consider this collaboration precious, since has allows us to improve our local knowledge and the professional relationship with high potentialities for the future, due to Arteza's great professional skills and cooperative attitude.

It's vital for LAND, located in Milan, Italy, to have Arteza as a proactive and trustworthy Russian partner, as they are in a position to give us great comfort and strong confidence during the overall design process.

I would like to point out that LAND will be glad to continue a collaboration for any future projects and to recommend Arteza as a local partner to any possible clients.

Regards
Andreas Kipar
